EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Matthew J. Lattig on 5/27/2004.

The application has been amended as follows:

Claim 20, line 3, change "a circuit element" to --a magneto resistive circuit element--, and in lines 4-6 page 6 and in lines 1-2, page 7, change "the circuit element" to --the magneto resistive circuit element--.

Claim 21, in line 3, change "a circuit element" to --a magneto resistive circuit element--, and in lines 4-8, change "the circuit element" to --the magneto resistive circuit element--.

Claim 22, in line 3, change "a circuit element" to --a magneto resistive circuit element--, and in lines 4-8, change "the circuit element" to -- the magneto resistive circuit element--.

Allowable Subject Matter

2. Applicant's arguments see page 10 filed 04/02/2004, with respect to claims 19-22 have been fully considered and are persuasive. Therefore, claims 2-4, and 6-22 are allowed.

The cited reference of Galecki et al (USPN 6362943) discloses an active current limiter (shown in fig. 5) comprises a circuit (such as comparator U4) limits a bias current (bias current is supplied by a control bias M2, R3, D1) due to a short circuit event. However, the cited reference of Galecki does not teach or suggest a third circuit as recited
